**Lippert Components introduces the somnum® Odyssey heavy duty innerspring mattress for “big and tall” sleepers**

**Elkhart, Ind.** — Lippert Components, Inc. (LCI®), a leading designer and manufacturer of mattresses serving a wide variety of markets, has introduced their latest somnum® Sleeper Series mattresses for the heavy truck market. The new somnum® Odyssey heavy duty innerspring mattress is designed and built to maximize comfort for “big and tall” sleepers.

To provide a better night’s rest for the heavier sleeper, the Odyssey was designed with an enhanced high-profile 364-Series innerspring core and a 3" high density foam topper. Together these features provide increased durability and stronger support. The springs in the 364-Series feature a higher coil count and a stronger gauge wire than standard innerspring mattresses. The somnum Odyssey is topped with a premium soft and breathable quilted knit cover with an extra inch of comfort foam sewn into the quilting. It also offers an insulation pad to promote a quiet night’s sleep and features a very comfortable and supportive 9" height.

“We had so many fleet managers ask us if we had a mattress that could support drivers who are 300-pounds or more, that we realized there was a real void in the marketplace.” says Mike Padnos, Business Development Manager at LCI. “After hearing the stories of how these drivers were bottoming out and flattening the generic 4" and 5" foam mattresses out there, we knew we could develop and deliver a robust and supportive mattress for these drivers.”

The Odyssey is available in two sizes: 9" x 38" x 80" and 9" x 42" x 80" and carries a three-year warranty.

Lippert Components continues to expand their somnum® Sleeper Series mattress line to mitigate some of the negative aspects of the job of the long-haul truck driver. Getting a restful night’s sleep

in a Class 8 sleeper because of a more comfortable, durable mattress is an important factor for drivers who spend 200-plus nights on the road every year. LCI recognizes that all drivers or sleeper configurations are not the same and therefore require some unique mattress specifications. The somnum® Odyssey offers long-lasting comfort for the heavier sleeper.

All somnum mattresses manufactured by Lippert Components are produced in an ISO certified facility and are made in America. LCI has been producing quality mattresses since 1997. Combined, LCI's Goshen, Indiana and Nampa, Idaho facilities produce over 3,000 mattresses every day. The 1,100-plus team member workforce in LCI's mattress divisions, and all LCI-operated production facilities, are encouraged to impact their communities through quality business practices, social outreach and volunteerism.
