## **NEWS ANNOUNCEMENT**

### **For Immediate Release**

Triangle Suspension Systems Substantially Improves Leaf Spring Product Corrosion Protection  
DuBois, PA (October 29, 2018) Triangle Suspension Systems has substantially improved the corrosion protection of their multi leaf and parabolic springs by adding a new high performance, corrosion resistant water-based coating.

Damage caused by corrosion is an on-going and costly issue affecting most North American truck fleets. Triangle evaluated several coatings for salt spray corrosion results, dry time improvements and process capabilities in order to offer the industry leaf springs that would not show signs of corrosion in a short period of time. The test results for the new coating show that it offers three times the corrosion resistance distinguishing Triangle suspension leaf spring products as an excellent choice for vehicle operators.

Since the new coating continues to be a water-based product and low in VOC's it is compliant to today's environmental rules and guidelines and does not require a Proposition 65 warning label.

The new corrosion resistant Triangle leaf spring products are available throughout North America from their network of 1400 distribution locations. Visit [triangleusa.com](http://triangleusa.com) to find out more about their products and where they are available.

#### About Triangle Suspension Systems, Inc.

Triangle Suspension Systems, Inc. is a leader in providing quality undercarriage products for heavy, medium & light duty trucks and trailers in the North American market with a nationwide network of over 1400 distributor locations. Their USA-manufactured products are known for consistent quality.
